

PAMPERED PETS AND MSM

MSM MethylSulfonylMethane

“The Beauty Mineral”

MSM is an abbreviation of methylsulfonylmethane, an organic form of sulfur. Many studies have found MSM to increase cellular repair and rejuvenation, thus the “beauty mineral”.

MSM improves:

1. Skin health and complexion
2. Flexibility
3. Diminishes Inflammation
4. Detoxifies the body
5. Strengthens hair and nails
6. Accelerates healing

We at Nutra, infuse Opti-MSM into many of our products to accelerate our ability to “feed” and heal the skin.

Nutra Health Opti-MSM is distilled FOUR TIMES for purity. This makes it an organic sulfur-containing nutrient that supports healthy active lifestyles by providing nutritionally essential sulfur and methyl groups.

This statement has not been evaluated by the Food and Drug Administration. This product is not intended to diagnose, treat, cure or prevent any disease.

We do this by offering time proven products for specific needs without making your pet worse from chemicals and allergens.

PAMPERED PETS SKIN AND FUR ULTRA RELIEF MSM CREAM

After a great deal of research, these pets found products for **both** their skin health and issues. Whether it's a scrape or wound, **Nutra Pampered Pets Skin and Fur Ultra Relief MSM Cream** helped thier fur shine and relieved the irritation from wounds, hot spots, and bug bites.

HELP them be happy and get Nutra Health products for People and Pets!

All of our products are plant based Vegan Non-GMO, hypo-allergenic and Pet Friendly!

Cats, ferrets, and some snakes are sensitive to essential oils, so please don't use this on these pets.

HOT SPOTS –DOGS AND HORSES

Hot spots, also known as acute moist **dermatitis**, are red, moist, hot and irritated lesions that are typically found on a dog's and horses heads, hips or chest areas.

Apply our Nutra Fur and Skin MSM Cream to affected areas until absorbed. Repeat this process as needed until these lesions have dispersed.

Relief from Hot Spots on Dogs and Horses
